REGIONAL COALITION MEETING AGENDA
Española City Chambers
405 N. Paseo de Oñate, Española, NM 87532
April 10, 2015
9:00a-11:00a

A. Call to Order – Mayor Lucero – 9:00a-

B. Confirmation of Quorum - Mayor Lucero

C. Approval of Agenda – Mayor Lucero

D. Approval of Meeting Minutes - 9:15a (Tab A – In board packet)

E. Discussion/Action Items (1.5 hours) 9:15 – 10:30a
   A. NM Congressional Delegation Updates (5 mins) 9:15-9:20a (Tab B – In Board packet)
   B. Presentation by Pete Maggiore, Asst. Manager Environmental Projects Office (30 mins) 9:20-9:50a (Tab C – In Board packet)
   C. Presentation by Carole Rutten, Deputy Director of LANL Community Programs Office (30 minutes) 9:50a-10:20a (Tab D – In Board packet)
   D. Report from the Executive Director (2 mins)
   E. Action - Review/Approve of Documents (10 mins) 10:20a-10:30a
      a. Review/Approve Board Dues Plan (5 mins)
      b. Review/Approve 2015 Regional Coalition of LANL Communities Work Plan (5 mins) (Tab E – In Board packet)
   F. Review of Financials (3 mins) 10:30-10:35a (Tab F – In Board packet)

F. Meetings at a Glance (5 mins) 10:35a-10:40a (Tab G – In Board packet)

G. Public Comment (20 mins) 10:40a-11:00a

H. Adjournment – 11:00a
About the Regional Coalition of LANL Communities:
The Regional Coalition is comprised of nine cities, towns, counties and pueblos surrounding the Department of Energy's Los Alamos National Laboratory (LANL). Founded in 2011, the Regional Coalition works in partnership to ensure national decisions incorporate local needs and concerns. The organization's focus is environmental remediation, regional economic development and site employment, and adequate funding for LANL. The 2015 Board of Directors includes Chair, Mayor Alice Lucero, City of Espanola; Vice Chair, Councilor Andrew Gonzales, Town of Taos; Secretary/Treasurer Javier Gonzales, Mayor of Santa Fe; Commissioner Henry Roybal, Santa Fe County; County Councilor Steve Girrens, Los Alamos County Council; Commissioner Mark Gallegos, Taos County; Governor Earl Salazar, Pueblo of Ohkay Owingeh; and Governor Raymond Loretto, Pueblo of Jemez; Rio Arriba County Commissioner Barney Trujillo; http://regionalcoalition.org.

For more information please visit the Regional Coalition website at http://regionalcoalition.org

Attendance ................................................................................................................................. 1
Welcome and Introductions .................................................................................................... 1
Confirmation of Quorum ......................................................................................................... 1
Approval of Agenda ................................................................................................................ 1
Review of Strategic Plan.......................................................................................................... 2
Review of 2015 RCLC Draft Work Plan ............................................................................. 4
Review of Bylaws .................................................................................................................... 8
Meetings at a Glance............................................................................................................... 14

Attendance
Alice Lucero (Chair RCLC); Los Alamos County Councilor Steve Girrens; Town of Taos Councilor
Andrew Gonzales (Vice Chair RCLC), City of Santa Fe Mayor Javier Gonzales
(Secretary/Treasurer); Santa Fe County Councilor Henry Roybal; Barney Trujillo, Rio Arriba
County Commissioner; Governor Raymond Loretto, Jemez Pueblo; David Trujillo, Rio Arriba
County.

JLH Media team member Alexandra Pratt.

Welcome and Introductions
Mayor Lucero called the meeting to order at 9:17 a.m. The public in attendance introduced
themselves. All the attending coalition members introduced themselves along with JLH Staff.

Confirmation of Quorum
Mayor Lucero confirms quorum.

Approval of Agenda
Mayor Lucero suggests making Agenda items ‘d. Review Strategic Plan’ and ‘e. Discuss and Review Draft Work Plan’ get moved up to the first items on the agenda, with ‘a. Review Bylaws’ and ‘b. Review Joint Powers Agreement’. Agenda is approved

**Review of Strategic Plan**

Brian Bosshardt (BB) gave a brief background on the RCLC’s history in order to inform new Board Members of previous work. BB: ‘Our county council in 2005 developed a program called progress through partnering. Our council’s goal was to reach out into the region to discuss partnerships. The coalition was part of that, then went to individual communities to explain our thoughts regarding this effort—got people on board to discuss how LANL’s role influences Northern NM. Supporting people working for the labs and living in our communities. Provide a forum for Department of Energy to provide facts on the issues—forum for elected officials. Developed a joint powers agreement—taken to the state, approved by Dept. of Finance. Each individual local government bodies approved it in joint councils. In a nutshell—it was about understanding importance of LANL, with a specific focus on clean up.

Mayor Javier Gonzales (MG): That is broader than I thought. The priorities seem to be on environmental management; progress/investment to be made in the communities on this topic. Discussion on how economically small businesses and communities can participate in what the Labs (LANL) are doing. Important distinction to understand the parameters of the Coalition. The Labs and their presence in Northern NM then ok, let’s go through that conversation. If it’s about environmental, which is my primary concern or priority, then I think we need to state it. In my conversation with Mayor Coss (former Board Member) and others is that the driving force of the Coalition was to make sure there was accountability and a voice regarding environmental impact.

BB: Page 2 of the Joint Powers Agreement addresses this issue.

Commissioner Andrew Gonzales (AG): Mayor Coss was an advocate for economic development coming from clean up initiatives. Much like I feel about Taos—we have a due diligence to make sure we have clean air and drinking water in our communities. In that spirit, it’s important that we continue to push that. We are not like Rocky Flats—cap and cover—my constituents think that we are similar. I want to make sure we are doing what we say we are doing. Mayor Coss did a great job of advocating for that. Articles really touted clean up issues were spearheaded by Mayor Coss.

MG: Our work plan will help set priorities. The RCLC’s participation is not limited to clean up.

AG: Clean up priority is my number one. Any time we have ever lobbied it’s been with the priority of clean up funding and initiative.

Councilor Steve Girrens (SG): We would be short sighted if we zeroed in on one thing. The pragmatic position is that this is the largest economic engine in the northern part of the state. As elected officials we need to focus on creating a forum for this type of discussion. We then should find out how to maximize for our communities ways to work together. We had as second priority issue—subcontractors—which has gotten positive traction. The environmental is important too—a year ago this time we were hearing that DOE wants to have some input into that. These kind of gatherings are not that common that regions come together—communities
come together...there's a benefit to having more on our plate than environment. Economic development is part of workforce. We have this opportunity to figure out how to maximize, so we need variety.

Mayor Alice Lucero (ML): Clean up has always been the priority but economic development has to do with the workforce and small business. We need to make sure that our communities are still served and that we still benefit from LANL being here. Clean up creates jobs. Same thing with local contractors. When they get a contract at LANL they hire from our communities—those are the two main things; clean up and economic development.

SG: I do not believe that our role is to debate the mission of the Laboratory. Our role is to advocate for our communities and figure out how to coexist with it and benefit from it. How do we help it help our kids, education and small businesses? How do we increase the positive outcomes?

Governor Raymond Loretto (RL): I have similar views to SG. I think the Lab has been here for a long time; some of the tribal communities have been here for a lot longer. Legacy waste, the dumping sites, prior to any laws—do we know where these sights are. We think about the waters coming down, the migration of elk and deer that we harvest. These are some of the concerns we have—on the flipside, we think of the welfare of our communities and job opportunities. We are close but far—we don't have the contacts or forum to bring our concerns to the table. How do we educate and motivate our youth? If that door isn't opened, it will always be closed. At the same time, we think of economic development. We have only two roads going into LA; one through Jemez, the other through Santa Fe. If there is an emergency situation, which way will you go? We have been working on a bypass for the last 40 years so that we are safe.

ML: We have the chance to take these items/issues to our governing bodies.

MG: just to build off of what my LA colleague has said—I agree. There are facts that are in place. Santa Fe is a huge beneficiary of the Labs. There is an opportunity through the environmental clean up efforts to develop jobs in clean up. The mission of the lab has generated waste and legacy waste they are not addressing. We are moving backwards because of the mission that exists there. How do we talk about the mission? How do we use a collective voice to get more monies into environmental clean up; and 1) Take care of legacy waste that we know can cause harm?; 2) That we are holding DOE accountable to the proper standard.

MG: They [the federal government] have gotten comfortable with funding with whatever they feel is the capacity of the community to do the work. They are generating waste in pursuit of their mission, so it's kind of one of those things where we have to hold them accountable to match it with dollars to provide the proper clean up. The waste continues to be present and can have an impact in the environment. I want to figure out how we can message that it's not enough that you can just give what you gave last year. As part of our effort to provide environmental review, we have to develop for each program a dashboard so we know what can be properly funded so we can monitor and keep track of progress being made. We need to the efforts to come to a conclusion. If they aren't fulfilling their mission here, we have to raise our voices.
SG: that’s a very good point, and again, that’s the value of this group and this forum. Just look at the turnover around the table. Being able to understand the nuances: legacy waste, the budget that takes care of what’s being generated that you don’t even know about. We need to set up these briefings and understand the money comes from Congress. We have to do our job to make those appeal so our delegation and that has to be done in partnership—stronger if we are with the citizens, Dept. of Environment, and go together to ask for priority. Do we know what’s happening with the chromium plume? This group, this work plan needs to have updates. So that if we come and go, whoever sits at this table knows what is going on. These are complicated activities. It’s a complicated structure—more complicated when we start adding in the nuances of NNSA and the environmental management office. I think DOE would come all the time to give us the progress reports. No work gets done unless there’s money to do the work. We want to plug in where we can influence the agendas.

AG: Gov. of Jemez, thank you—we are miles away from our people who do not hold the tech jobs at the Labs. From my constituency—are we going to move past the medium-level income? Taos looks like a third world country compared to Los Alamos (LA), while a backflow of the money stays in Los Alamos. I have nothing to point to...$189M is what they [the federal government] gave us last year for cleanup. How do I tell that the $1.3B given to the Laboratory budget is more important than what we get for clean up. We are the elected officials that can step into the issues. Why isn’t environmental clean up equally as important? Debate of the mission should be included because the debate of the mission is vital to the continued discussion. We are not big enough in population to take care of the environmental issues. I feel like we [New Mexico] are an environmental dump. The $189M from a standpoint of mobilization barely mobilizes. We are not the Citizen’s Advisory Board. We represent constituents. These are the people we should be standing up for. I have a hard time justifying how LA is the richest county in the state and the nation, while all around the county we are going broke. If LA gets a hit they get a haircut, if our county gets a cut we are removing vital organs. We have to lobby for clean up—there’s more money in remediation than economic development.

Review of 2015 RCLC Draft Work Plan
This section initiated a review of a 2015 Draft Work Plan to guide the Coalition’s activities, sectioned off in a Short Term, Long Term, and Ongoing strategy to get items accomplished that will be reviewed at the end of next year as an annual progress report.

MG: How do we get started on the work plan?

ML: Let’s look at last year’s draft.

Andrea Romero, Executive Director (AR): I’ve added a few items that will go into an additional draft. As we have framed these strategic planning sessions—each of these ideas have been put into this work plan per our one-on-ones. Some things I’ve added—adding to communications strategy in item 3 talking about board outreach efforts, dollars specifically. Let me preface: short term goals, grants to apply for, long term goals on page 2—this is over the course of the full year, items we can...building into this year’s goals. Ongoing work that we need to be doing for every meeting that we host.

What I would hope—I’ve been collecting conversations to add to the work plan—I hope that we can revisit in one year and measure the outcome next year. To make sure we’ve met our
objectives. I’ll add in the conversations from today and then have this draft configured into a doc in April. Any discussion that you want to have with this document; it’s a living doc and we can edit and add any items that come up throughout.

ML: We can add change and delete, next meeting it will be in final form.

MG: On the increasing of relationships which seems to be critical if we want to start more funding for clean up and economic development and workforce growth—I know that the visits have been once a year to DOE?

BB: Sometimes we’ve been back twice in one year.

MG: Is that enough? Can we figure out a way to be more in your face so they don’t forget us the second we leave their office. Communications where they get tired of seeing us—enough to the point that we’ve been there enough in a way that actually makes an impact.

BB: They know who we are. We are making a difference. It’s the board’s call—driven by timing, budget, Congress. I think the timing can be driven by you, the Coalition.

MG: Power map developed—who can message to them best. For instance I found out that one of the Deputy Secretaries has a home in Santa Fe—we have to find a way that the Mayor goes to spot her out. There are different ways to go at them beyond just a 30-minute meeting. Ask JLH group to build a communications strategy that directly focuses on influencers of environmental manager funds in a way that sets goals for us quarterly for how we are messaging and putting in an effort to get more dollars into that place.

AG: Our priorities are changing every month. The last time we were there we were addressing subcontractors, but next month it could be something different. We likely can’t send entire board, but we get our voices out there some shape or form.

SG: We don’t have to go to Washington to contact them. They have reps and boots on the ground. I totally agree that we have to come up with some kind of strategy of laying out who is making the decisions and where does the input happen as far as the budget is concerned. Right now they are working on ’17 budget. We’re chasing the train that’s left the station. If we show up in February and ask for $50M, at that time, that $50M has got to come from someone else. When we got the “plus up” two years ago that came from someone else’s budget allocation, which causes competition. We have to be realistic about how we can influence. We need to get educated about the communication opportunities and calendar of staying in their faces and communications.

MG: We should know who drives what decisions on funding from the program level in Albuquerque and the Sandia Laboratory, all the way into Washington, so we can make relationships and understand who’s-who and who influences them such as the private sector and research universities. Ultimately it will get to a political level, but we have to get in early to address legacy waste, money for clean up and why increase $189M to $250M.

SG: We need to understand the nuances to understand the different pieces.
ML: JLH can come up with a calendar of when the best time to be in DC. Congress about to adopt FY16 but when do they start putting numbers in. When is the best time? I think staff would be the one to know (delegation staff members) in pointing those dates out.

AR: I’ve been speaking with our NM delegation who wants to commit to a relationship with RCLC—Ben Ray Lujan, Martin Heinrich and Udall. Discussing issues and timing on issues so they can provide input directly to board members and they have committed to a monthly discussion to designate a collaborative agenda.

BB: I want to respond to MG—we met with a lot of the folks you mentioned. What that tells me is that we as staff need to do a better job of communicating who the influencers are. We can do some more on educating you on those specifics.

MG: Is the meeting enough?

SG: Has to be continual.

MG: They listened to us.

BB: It’s the DOE side. We can help with the timing of that and talk with the lower level staff about our needs.

ML: as far as our congressional delegation when they are on break from Congress, we need to meet with them.

SG: We have to get out ahead instead of chasing budgets.

MG: the messaging becomes important. Governor, the pueblos with ancestral lands have a big influence on this. Government to government relations can carry a strong voice as to why we need to increase the amount of money. Do we show data? They’ll allocate money then.

[gap in audio]

MG: we need to build the mechanism by which we know all the players and all environmental projects that we are working on, plug what the budget is to clean it, how the funds are coming in and what the outcome is so that we know what the measurable are. We need to delve into being able to offer some type of recommendation as to what we think the priorities are. That work plan has to involve how we want to become educated and set priorities so that when we message into that influencer map we know what priorities we have—it’s not just hey we need to go to $400M, this is exactly where the monies need to go.

SG: we need to put exactly what you need together; offices, contacts and projects, who does what, decides what and says what to whom.

ML: they way we have been informed is through DOE and other officials as to the status of various items. It’s a matter of giving them the time ahead of time to get them in front of this body.
MG: In our work plan—all of us are busy—all of us have tough calendars; in our work plan we have to figure out how to split up into groups and take on different objectives and so that aren’t missing content from meetings. After we look at it maybe we focus on particular areas in smaller groups. Need to make more progress.

AR: That’s a great segue—the work plan and meeting procedure—breaking into different committees and subcommittees’ could be built in to the work plan depending on the issue—financial, communications, clean up.

AG: We did that last Oct. considered the formation of committees. Now it’s more imperative because of new group members.

AR: JLH has begun mapping out a visual map starting with DOE. We’d like to work with you on the visual side and the brass tacks.

MG: Let’s not forget the dashboard—all projects open, certain dollar amount, etc.

[Gap in audio]

MG: When you think of the investment that Taos is making, it’s about having the technology to take advantage of infrastructure. If it’s true and there’s a tax on accessing scientists that can participate in economic development initiatives or clean up business creation, then you’re locking out potential for local governments. We have to talk about the technology at the Labs that can move off of the Hill (LA) and into the communities with infrastructure.

AG: There should be a community commitment plan guaranteed every year that we can take back to our constituents.

SG: We need to understand how that’s funded and where we come from.

ML: Let’s wrap up the draft plan.

MG: Can you recap for us?

AR: I will add in all of the comments collected in this meeting, add to the plan, then ask for you to review before the next meeting and then we can approve. We can approve by next session and hopefully get started on these issues.

SG: I’m sorry to be such a pain this morning. One of the things I want to make sure that we have priority on from our economic development point of view is that you should be moving full speed on getting the grant proposal into DOE.

AR: That will go in on the end of April. Will present draft proposal at the April meeting.

SG: When was your meeting with the Sect. of Energy, Moniz?

ML: August 2014
SG: Remind us what he said to Kim Davis Lebak?
ML: He wanted her to make sure that we do get funded and that in order that the labs are successful is via vibrant communities surrounding the Lab.

SG: The power of the ML having the Secretary’s ear and he said let’s get these people funded...it’s coming up on 12 months. It’s urgent.

AR: We can pre confirm that that will be the first thing I am working on before our net meeting.

SG: So that you’re not the only one on the barrel I will help pull together a map.

ML: AR has done pretty well—she started only 6 weeks ago.

BB: is there a need to bring the proposal to the committee or do we even need to see this?

ML: Send us the draft, if we have comments...

AR: everything we have in the work plan will go into the proposal.

**Review of Bylaws**

This time was used to review all Bylaws and address questions as brought up in the past month for the new Director and Board Members to review what rules and bylaws they are governed under.

First topic, reviewing the term ‘tribal officials’.

ML: Tribal official. Normally in our governing bodies, I make an appointment and our tribal council ratifies.

RL: I was thinking of this—as I look at my tribal council, the only way tot get to sit on the tribal council is to come up through the ranks. In this particular case, if we have a governor that is not doing any of this stuff a lot of our work is going to not be followed. I’m vouching that it would be up to the tribal council regarding who they want to appoint to the Coalition.

ML: What this alludes to is that it needs to be a tribal official who brings it to council.

AR: Then someone on tribal council. With that tribal council member, we still allow them to be a voting member on the RCLC? [Yes from crowd. Heads nod in agreement.] Great.

Another question—are we recruiting other tribal officials to be in the coalition? There has been a question of that if we are recruiting additional communities that may want to participate.

ML: we have been recruiting Santa Clara Pueblo and other pueblos. As far as other cities are concerned, the region is included. One time we talked about Las Vegas, but that never came to fruition because they are a little far out.
SG: I think Santa Clara would be excellent.

Commissioner Barney Trujillo (BT): Interesting dialogue in terms of what the Coalition is—I’m impressed with the uniqueness of the Coalition. I am still learning the ropes on our [Rio Arriba’s] direction. I agree with the Councilor [SG] I want to maximize our relationship with the Labs. It will benefit our constituents. Collecting fees on a local level—that’s a big task. We may never conquer it but I’m impressed with the vision of MG on how to do that. As far as Rio Arriba’s concerned I want to grow that relationship I want to talk about what LA can bring to the table. It’s one thing that the Labs are so privileged. In Hobbs they have a lot of oil and gas—that was luck. LA is a lab and it started and we are lucky to do business around them while protecting our watershed. It’s a big thing to get a hold of. I want our representation to be for the growth of the communities. I’m open to working with Santa Clara. They are interested in relating globally.

AG: I agree with 98.5% of your comments. The 1.5% that I disagree with is that LA is luck of the draw. Unlike Hobbs it was a Conoco that invested, [in our case] it was the Federal Government. Our tax dollars fund this [the Laboratory]. Luck of the draw put them in a region that should benefit everyone because we all pay into that. I think it should be a spread of the wealth. And I don’t think we’ve seen enough of it. Legacy waste is going to sit on the hill and none of us will benefit—if the Labs go away the waste stays.

RL: I want it noted here that I don’t know how many years back that the Labs recognized 4 core—Cochiti, Jemez, San Ildefonso and Santa Clara Pueblos—even that group has begun to not come together to make the requests that they should be.

AR: I have San Ildefonso, Santa Clara, Pojoaque and Cochiti that we are actively recruiting to the Coalition.

AG: Pueblo of Ohkay is already on the Coalition.

AR: They still are. We have clarified appointees so now can reach out to Gov. Earl Salazar.

AG: Would it be beneficial to reach out to Pueblo Governors?

RL: Definitely.

ML: Let’s move onto dues.

AR: The next proposed item for discussion is under expenses.

ML: I was thinking it was on the resolution...each pays a certain amount?

BB: Nothing ever put in writing. We can afford to provide the following. We’ve never enforced a bylaw that “you shall give this” but rather give what you can afford.

ML: It’s something we need to revisit. As far as Española, we are giving $10,000 and we have a $10M operating budget. Considerable when we lost 15% of our revenue last year.

SG: I think we need to give a minimum to have skin in the game to create the pool [of funding].
ML: when we started providing monies from different entities we didn’t have money coming in from DOE.

SG: We’re asking for new from DOE; the last time we got money from DOE it paid a bill. We’ve been living off of LA. If we don’t know what we are going to do, we all have to have some skin in the game. I totally understand the stress. That’s .1% of the budget, and if we don’t have to do it this year we figure out new work plan and budget and not collect any but we do need to have skin in the game.

AG: The skin in the game as elected makes us accountable to be here because our constituents are paying us to be here. The issue is that—perception is reality. LA, because they have a bigger contribution to the coalition has more influence. That’s not the case, but those are the battles we face. I understand we can’t use clean up money. We have to do something. Not sure about how our fundraising efforts are going.

ML: We should pay something it’s not that that I want to get away with not paying anything at all. Santa Fe pays the same amount to the Coalition but their GRT is much higher. As far as LA is concerned they contribute the majority, however, that is their way of giving back to all of us. We don’t have the luxury of the GRT they do. They are not paying for more of a say but their way of giving back to each one of us.

SG: It’s not giving back it’s a responsibility to the region to try to be a catalyst to improve on as many things as we can think of.

AG: What happens if the GRT goes to a non-profit. LA loses the windfall of GRT; the contribution level goes down.

MG: I have to excuse myself [from the meeting]. I think I owe it to our constituency to have a voice to influence what we collectively advocate for. I’m ready to pay whatever the fair share is that the board feels is appropriate. To the perception....what I think about LA or at least what I’ve seen, there’s never been a case or point where the councilor or the staff has tried to move in a different way. There has been a respectful point of view. Just because they’re paying 80% or 90% of the dues and we may disagree but we are all in this together. 20-30 years from now our kids will be raised in the environment that we are creating. We will participate how the board feels appropriate. If this dialogue...I will be back if possible.

AR: There’s a proposed amendment on the table. I suggest a sub-committee to address these issues.

SG: If we struck it right now it doesn’t change the way we are proceeding. This is just discussion today, so whatever comes back for adoption will do so in April. This may not be necessary.

Good. Start the clock again.

AR: The next item: E. Conflict for interest...

ML: I feel this is not a topic we need to discuss. We have so many people employed by the Labs.
AR: Item F., the Sec. Treasurer should perform these duties as follows....question: shall we amend bylaws that the ED and her team, items of administrative duties.

ML: Sec. Treasurer doesn’t need to actually take the minutes.

AR: The way it’s stated we can keep it.

AG: When it comes to items on the Treasurer...is he the only one who can give approval?

BB: Practice in the past ED can approve anything unrelated to a JLH invoice.

AR: Item 2—shall have oversight of the RCLC assets—

SG: Is there a problem with how things have been happening? Is this to fix something or to make it cleaner?

AR: Currently we are not operating on a clear budget. As part of a work plan that would be us asking for a clear budget so when talking about oversights and assets....

ML: We should have a budget and then LAC ....

SG: We don’t need either one of these for more clarity at this time? I think we are fine.

AR: Item 3, shall provide cause...

SG: I see your positions with figureheads—their job is to come together as 3 when the rest can’t—not giving them stuff to get done.

ML: what we need to develop is a spreadsheet with our budget on it so that when MG gets report he sees our balances. I don’t see any problem with delegation of duties...let me go back to something. Bi monthly.

AG: We should still work monthly and do action items bi-monthly. Monthly comes quick it seems like there are still items to do.

SG: If we get it together we can get back on our schedule of having/being able to keep track of what’s going on. Monthly is still plenty. We do a better job of getting things done.

ML: we need to change quarterly to monthly.

SG: I’m ok with this amendment.

All parties agree to the amendment to change meetings from ‘quarterly’ to ‘monthly’ and it is approved.

ML: The amendment goes in. Special meetings I think is fine. If ever the Secretary of Energy comes to town we call a special meeting.
AR: Basically pursuant to NM Open Meetings Act, all agendas are posted three days prior to the meeting. If we want to pursue an item we can set an agenda week prior to the Tuesday so we can on or offline get feedback.

SG: Leadership tees them up and whatever’s in there gets passed all at one time. Our responsibility to look at the content.

ML: As far as rules of procedure. AR and I will work on that and then we’ll bring it to you as a draft for consideration. As far as posting AR, we post on the website and then when you send to everyone we post on you websites. We have an archaic website but we’re working on it. Most cities are doing that.

SG: We had something come up yesterday: archiving—webpages get loaded but not a good place to archive something. We can volunteer to help with archiving documents so we don’t depend on websites that have an ebb and flow.

BB: We have our own separate open meetings act that outlines our specific scope of meetings act.

ML: We may need to revisit it.

AR: OK.

ML: I think that covers it. Committees?

[Gap in audio]

SG: I’m happy there’s more people here….to me it’s kind of like it’s good for us to know what’s in it but it’s not good to change it because I don’t want to lose anyone who’s here today.

ML: Maybe we can have a Memorandum of Understanding…it will be easier to manage. The JPA would have to go back to DFA and then go to all the entities again.

BB: We don’t have to address this.

ML: It’s a separate document all together.

SG: I didn’t see any problem with our JPA.

ML: I think it’s in good shape.

AG: With our focus being environmentally driven, we have the issue of the legacy clean up and enhanced missions of the Lab. I think there is room in here that we should evaluate…I don’t want to hinder. If we are going to be transparent with our constituents, we have to be cognizant of the fact that the mission is contrary to everything we’ve talked about today.

ML: Alternative energy, research. I support LANL. Nuclear is just one of them. How does the board feel about revisiting this.
SG: I like it. What’s under new missions—it’s all in how you interpret what “Mission” means.

Again, I don’t know how we want to address this without going through the hold mechanics of disrupting our JPA. The question: how hard would this be if this did change? I’d like to leave this alone for 6-12 months and address within the communities. There are other things in here that capture what we’re trying to accomplish.

AG: If I take it back to our governing body [in Taos], and see what the indication is about pushing the language. There are people within our community that are supported by the Labs. For me, the feeling personally is the fact that we continue to push the clean up but we make more waste in order to clean it up. Clean up what’s legacy and what’s there. We can set another time and place in 6 months. I don’t think my constituents have ever seen this, in full transparency.

SG: Don’t want to replace the words but eliminating “I” altogether. We all want it to be stable.

AG: We are given credit for more power than we actually have. Our federal delegation is responsible for steering mission. If we’re talking about the subject then we should have some kind of a stance on it. How they operate at the Fed level b/c they hear you for 30 minutes and 6 to 8 months of the year we are ancillary. I would like to revisit.

ML: Steve, I’d like to see “i.” remain.

[Gap in audio]

ML: I don’t think it needs to be addressed because we are not going to change public nature of our meetings.

SG: What I think I just heard you say is we do have public comment and we don’t’ necessarily need this under new words under 5e.

ML: I don’t think so.

AG: Have we adopted separate rules?

ML: That’s what Andrea and I are working on.

AG: I think I’m on board with public comment but discretion of the Chair—they set the tone on how heavy the agenda is. Public outburst or disruption is to have a presenter like Sec. Flynn and then be engaged with taking public comments. Time and place for public comments. Discussion during a meeting not a good idea.

ML: Only allow public comment during public comment meeting. Not going to do that to a presenter. Unless for some reason we have a need to call on someone but that’s at the discretion of the board.

AG: AR can put up a sign up sheet.
Fabian Trujillo (Alternate for Mayor Gonzales): rules about how the public should act in a public setting. There is a statement that they read every time during a board meeting so that the public knows how to comport themselves when they are speaking. Basically that they should be respectful, not interrupt speakers as they are speaking to the board, they should try to have solutions and also they say that the board may discuss what is on the discussion/agenda but not go off of that. It seems to work really well regarding controversial issues.

ML: Please get that to AR. Thank you.

FT: My pleasure.

AR: Our lunch should be here any moment now. We have a few announcements on the meetings at a glance.

ML: This is where usually at the end of each meeting we discuss what we’d like to have for the following meetings.

Meetings at a Glance
Agenda item E.a. in the packet. Next meeting is in the Española City Chambers on April 10th from 9-11a. All meetings have been henceforth moved from the third Friday of the month to the second Friday of the month. The next meeting will contain presentations from Pete Maggiore of DOE EM and an update from the LANL Community Programs office. The Draft Work Plan will be reviewed again, pending all revisions and additions and will be discussed for approval. Also, billing the Coalition members will also be discussed and voted upon. A Budget will be crafted by AR and BB and will be subject to the Board’s approval to close out FY15 and start FY16.

Kathy Keith of RDC is to be invited to present on May 8th in Taos on the issues pertaining to the LANL Major Subcontractors and other issues.

The June 12th meeting is now to be held in Jemez Pueblo.

Meeting Adjourned

OPEN MEETING ADJOURNED AT 11:04a.

Andrea Romero, Director
New Committee Assignments

US Senator Tom Udall has several new committee assignments in the new Congress. He is now a member of the Defense Subcommittee of the Senate Appropriations Committee. The subcommittee holds jurisdiction over the U.S. Department of Defense and Intelligence Community, and is responsible for producing one of 12 annual appropriations bills to fund the federal government's programs and responsibilities. Udall will also continue to serve on four other subcommittees that allocate key funding for programs important to New Mexico: the Subcommittee on Agriculture, Rural Development, Food and Drug Administration; the Subcommittee on Energy and Water Development; the Subcommittee on Military Construction and Veterans Affairs; and the Subcommittee on Interior, Environment and Related Agencies, on which he assumed the role of lead Democrat in January.

The Defense Subcommittee has jurisdiction over funding for New Mexico's three Air Force bases, White Sands Missile Range, and Fort Bliss—all of which play a vital role in our national defense and our state's economy. Combined with his position on the Military Construction and Veterans Affairs Appropriations subcommittee, this new assignment gives Senator Udall an even stronger platform to ensure that New Mexico's service men and women have the facilities and equipment they need to succeed and to support our national security. The Senator will also continue to serve on the subcommittees on Energy and Water, which oversees a significant part of the budget for the national labs; Agriculture, Rural Development, Food and Drug Administration, which oversees the budget for nutrition programs, U.S. Department of Agriculture Rural Development and many other farm programs important in New Mexico; and as the top Democrat on Interior, Environment and Related Agencies, which oversees energy permitting, public lands and wildfire funding.

He has also assumed the role of lead Democrat (ranking member) on the Senate Appropriations Subcommittee on the Interior, Environment and Related Agencies. The U.S. Department of the Interior manages America's vast natural and cultural resources, and holds important jurisdiction in New Mexico through its leadership of the Bureaus of Land Management, Indian Affairs and Reclamation; the National Park Service; and the U.S. Fish and Wildlife Service. As ranking member, Udall will hold a key position to push for funding for New Mexico priorities.

In addition to the Senate Appropriations Committee, he returned to the Senate Commerce, Science and Transportation Committee where he previously served from 2009-2012, and will also serve on the Senate Foreign Relations, Indian Affairs, and Rules Committees.

Late last month, U.S. Senators Tom Udall and Martin Heinrich introduced S.830, the LDRD Enhancement Act of 2015, a bill to increase the maximum percentage each laboratory director may set aside for Laboratory Directed Research and Development (LDRD) from 6 to 10 percent of the lab's budget. The U.S. Department of Energy's discretionary LDRD program advances the frontiers of science and engineering, invests in critical national security missions, and helps recruit and retain staff for national laboratories. The Senator believes that the legislation will open up more opportunities for high-risk innovation in energy and national security, attract top scientific talent to New Mexico and ensure that NM’s labs stay strong well into the future. He and Senator Heinrich are staunch supporters of LDRD and diversification of New Mexico’s national labs, which in turn supports the science and engineering behind the core nuclear security missions. Senator Udall will continue to fight for LDRD and technology transfer programs as a member of the Senate Appropriations Committee.

Committee Hearing with Secretary Ernie Moniz

Also late in March, Senator Udall participated in a hearing of the Senate Appropriations Subcommittee on Energy and Water Development. During the hearing, he urged U.S. Energy Secretary Ernest Moniz to work constructively with the state of New Mexico to safely reopen the Waste Isolation Pilot Plant (WIPP) and prioritize the B61 Life Extension Program, which supports jobs at Los Alamos and Sandia national labs. Udall reminded Moniz of the importance of respecting the state's regulatory role over WIPP as it negotiates how to pay the penalties the state has imposed. Udall has emphasized that DOE should not use funds designated for cleanup at LANL to pay the penalty. Here's a quote from the hearing:

"This was something I fought hard for as New Mexico's Attorney General — we won a lawsuit against the Department of Energy at the time. So I just want to take this opportunity to remind you, as discussions continue, that this is a unique situation. You're dealing with the only state in the union that has ever accepted a nuclear waste facility, and I'm hopeful that a constructive dialogue over the state of New Mexico's fines for the department can continue along that line."

Udall also pressed Moniz to ensure that safety remains a priority as DOE prepares to reopen WIPP. "I think it's very important that we see it be reopened safely — and I underline the 'safely' — and so I'm hoping that we take that cautious
approach to make sure that workers aren't at risk," Udall said, asking Moniz to make sure DOE does not repeat its mistakes and expose workers to unsafe radioactive conditions.

Udall and Moniz also discussed the threat sequestration poses to the National Nuclear Security Administration's B61 Life Extension Program. Both Los Alamos and Sandia national labs are instrumental in carrying out the program, which maintains our nation's nuclear weapons stockpile. Udall has successfully fought efforts to cut the program and save thousands of jobs at the labs, and he remains committed to ensuring it has funding to continue its critical mission.

**Funding Requests**

The New Mexico Congressional Delegation has an arrangement whereby the 5 members of the delegation share the salary of one person whose sole job is to assist New Mexico entities in finding sources of federal funding for which they can apply. A woman by the name of Kristine Dietz directs that office. She resides in the senior senator's office so she was first with Senator Domenici, then with Senator Bingaman, and now she is in Senator Udall's DC office. If an NM organization is looking for federal funding, they can describe their program and need for funding with her, and she'll do a funding search for them. Once they apply for the funds, she can submit a letter of support signed by all 5 members of the delegation. Organizations can submit a request for delegation office support either by sending an email to any of the delegation members, or by submitting a request directly to Kristine. She requires a thorough description of the program/project to be funded, a description of the organization/office requesting assistance, and contact information for the request. She can be reached by email at [Kristine_dietz@tomudall.senate.gov](mailto:Kristine_dietz@tomudall.senate.gov)
Los Alamos
Environmental Cleanup
Transition Update

Regional Coalition of LANL Communities

Pete Maggiore
Los Alamos Field Office

April 10, 2015
Outline

- Direction by Secretary of Energy to transition the legacy environmental cleanup work at Los Alamos from National Nuclear Security Administration (NNSA) to the Office of Environmental Management (EM)

- New EM Los Alamos Field Office

- Bridge Contract with Los Alamos National Security, LLC (LANS)

- Long Term Environmental Cleanup contract or contracts status
On September 26, 2014, the Secretary of Energy directed EM and NNSA to develop a plan for the transition of legacy environmental cleanup work at Los Alamos from NNSA to EM to:

- increase efficiencies in the environmental cleanup through employment of a specialized contractor (or contractors) and synergies with other EM operations

- enable the LANL Management & Operating (M&O) contractor to continue the focus on the core national security missions at the site
On March 10, 2015, the Office of Environmental Management announced that the EM-Los Alamos Field Office was operational.

Christine Gelles appointed the Acting EM-LA Field Manager

- Detail in Los Alamos began on March 23, 2015
- Detail for four months (or more) as permanent manager is recruited
- Position of record is at DOE-EM Headquarters, Office of Waste Management

Los Alamos EM employees have been reassigned to the new EM-LA Office.

Competitive recruitment of EM-LA Manager, a senior executive position is underway; other EM-LA positions are also being recruited.
Negotiations with LANS over the sole source bridge contract are ongoing

Bridge period of performance is expected to be between 18-24 months, the anticipated time required to conduct competitive procurements

Extensive collaboration continues to leverage existing subcontractor resources and to minimize adverse impact during bridge contract negotiations and implementation
EM and NNSA are working together to ensure that there is a mutual understanding of roles, responsibilities, accountabilities and authorities and infrastructure ownership.

A formal and documented agreement between NNSA and EM has been developed and is in approval review.

The transition will require ongoing coordination with NNSA related to nuclear safety oversight and landlord-related functions.

Even after transition, extensive interactions among NNSA and EM and their contractors will be required.
Long Term Environmental Cleanup Contract(s)

- Industry day was held on March 3, 2015
  - Standard "kick off" event to inform and socialize issues regarding long-term contract with potential bidders

- Industry response to EM's Sources Sought / Request for Information (RFI) were due on March 30, 2015
  - RFI requested capability statements, perspectives on scope challenges, contract structures, small business opportunities
  - DOE is pleased with the number of firms that responded
  - Input will be considered carefully in development of acquisition strategy

- A draft RFP is expected to be released this summer for the long term competitive based contract or contracts

- As we plan for the new contract(s), EM will carefully consider use of small businesses and local business considerations
Transition of the management and oversight of the Los Alamos Legacy Cleanup Project scope will strengthen those efforts and enable NNSA and its contractor to focus on the site's core mission.

DOE is committed to working with you as we plan and implement these organizational and contract changes.

To be successful, we will need to continue to work closely with our regulators, congressional delegation, and stakeholders.

EM and NNSA welcome questions and opportunities to provide more information if needed.
Community Commitment Plan Update

Prepared for Regional Coalition of LANL Communities

April 10, 2015

Priorities for 2015 Center on Three Goals

1. Community Commitment Plan (CCP)
2. Lab Goal Three - attract and retain talent and help ensure a vital future workforce
3. Stakeholder Engagement - develop informed community leaders and strengthen partnerships

Goal 1 “…design and lead regional implementation of the CCP to maximize its benefit for the Lab and the community.”

- 2015 CCP - $2.5 million from Los Alamos National Security
- Tell our story with consistency and multi-media messaging
  - Regular conference calls with strategic partners
  - Improve podcasts and incorporate a new blog initiative
  - Track issues and trends
- Expand and develop effective partnerships
  - Mutually beneficial
  - Regional
  - Build infrastructure for sustainability
...strengthen the future workforce pipeline

Research-based initiatives
- Effective STEM programs for K-20 students
- Proven professional development for teachers and principals

...strengthen relationships with economic development leaders...to benefit the Laboratory and the state

- Provide technical assistance
  - Regional Development Corporation
  - Small Business Development Centers
- Grow youth entrepreneurs in northern New Mexico
- Support entrepreneurial network facilitation
- Increase awareness of Venture Acceleration Funds

"The Rave in Espanola was just fabulous! Not only did each team take away valuable information from this experience, but I would have to say that each parent walked away with tremendous knowledge." Tina Aragon, Teacher
Questions and Comments
Regional Coalition of LANL Communities
Draft 2015 Work Plan

This is a Work Plan Outline to directly reflect the outcomes of the Strategic Planning session. It was drafted from the 2014 strategic planning and work planning documentation. This draft Work Plan is divided into short- and long-term goals, as well as ongoing work that the Coalition must accomplish. This is a draft Work Plan subject to Board review and approval.

Short-Term Goals (2 months, April to June 2015)

I. RCLC Internal Organizational Management
   a. Work Plan 2015 Draft
      i. Suggestion: Drafted and presented April 17, 2015 at next Coalition meeting for voted adoption by Board.
   b. Coalition Meetings Procedure
      i. Procedural Rules Adoption
         1. Review Draft rules for adoption in April 17th Coalition meeting.
      ii. Scoping Agenda Topics
         1. Currently no methodology for arranging new calendar for agenda items. Executive Director to draft methodology for vetting through agenda items for upcoming meetings and ensure all Coalition members are involved in planning process.
   c. Budget & Financial Management
      i. DOE 2015 Grant Application
         1. ED to draft and submit DOE Grant Application for $100,000 to fund Coalition business, not including any lobbying efforts, with support by Amalio Madueño, grant writer out of LANL Community Programs office.
      ii. Reimbursement
         1. Executive Director (ED) to draft a resolution on procedures for reimbursement
      iii. Board of Director Dues
         1. Decision on whether or not to collect dues for FY15 and what the relative amounts will be.
      iv. Budget
         1. ED to work with current fiscal sponsor, Los Alamos County, to understand financial and budgetary situation of the Coalition, to then draft a working FY15-16 budget for review in June 2015. That information will then inform a draft budget to then be tailored and further planned with the Secretary/Treasurer.
   d. Development of Internal and External Communications Strategy and Work Plan (ED and JLH Media)

Long-term Goals/ Projects (1 year from adoption of work plan)

I. Strengthen relationship with Board
   a. Regular Meetings
      i. ED to meet with each Board Director every other month, at minimum to discuss Coalition issues.
      ii. ED will facilitate forming Committees of the Board to discuss pertinent matters of Cleanup, Economic Development
II. Increased Communication with LANL affiliate Agencies/Stakeholders
   a. Ongoing engagement and updates on issues
      i. Quarterly meetings (at minimum) with LANL, LANS, NNSA and EM
   b. Environmental Clean up
      i. Quarterly meetings (at minimum) with CAB and NMED
      ii. Board meetings to follow calendar of efforts from DOE regarding cleanup scheduling.
      iii. Review FY16 and FY17 budget timelines and plan for when Coalition is to step in on various efforts
   c. Economic Development
      i. Quarterly meetings (at minimum) with LANL Community Programs office, Feynman Center of Innovation, RDC, VAF and the like
   d. Policy
      i. Monthly meetings with Congressional Representatives
         1. Meet once by phone or in person, before every Board meeting to discuss any input from each representative and speak on issues prior to Board meeting.

III. Recruit Additional Tribal Members
   a. ED to actively recruit members of Santa Clara Pueblo, San Ildefonso Pueblo, Pojoaque Pueblo and Cochiti Pueblo to have tribal officials serve as voting members on our board

IV. Economic Development & Cleanup Advocacy
   a. Work with LANL Major Subcontractors Consortium and RDC to receive regular updates and follow through on work efforts
      i. Cleanup campaigns employing local contractors
      ii. SCMC Pilot and Local Procurement
   b. Advocate to ensure LANL Community Commitment Plan maintains proper funding
   c. Work with DOE EM, NMED and NNSA to ensure waste generation is well monitored, regulated and matched by proper funding for any and all cleanup initiatives
      i. Monitor Top Cleanup Priorities of 2015 as designated by DOE EM and NMED
         1. Focus on campaigns for Chromium Plume and RDX Plume
      ii. Craft communications and messaging on advocacy for proper monitoring, regulation and funding of efforts
   d. FY16 and FY17 cleanup budget increase for LANL
      i. Travel to Washington, DC at appropriate time(s) to advocate on behalf of proper funding for FY16 and FY17 budget creation

V. Measure Advocacy and Work Outcomes
   a. Annual review of efforts and outcomes of RCLC in June 2016
   b. ED to work with NMED and DOE EM offices, respectively, to understand planned cleanup activities, their goals, their timelines and budgets required.
      i. Continue to stay engaged in news and continue to gather regular updates on WIPP
      ii. Monitor budget and outputs based on cleanup work completed
         1. See that NMED and/or DOE EM craft dashboards to address efforts made, money spent, and overall progress reporting.
   c. Board to invite, ED to coordinate information with NMED and DOE EM to understand risk mitigation of any future contamination and stewardship planning
      i. Review calendar of deadlines on established cleanup goals
      ii. Ensure Board is receiving regular updates as cleanup deadlines are achieved
   d. Coalition to craft its own critique/evaluation of cleanup progress
      i. ED to work with the Citizen Advisory Board and LANL Major Subcontractors Consortium to best understand LANL strategic cleanup initiatives and draft system to evaluate activities
   e. Increase budget for FY16 and FY17 for LANL cleanup initiatives
      i. Review outcomes of advocacy and work effort to increase cleanup work

VI. Execution of Communications Strategy & Work Plan
   a. Internal Communications Strategy
      i. JLH to work with ED to craft strategy to ensure all Board Members are up to speed,
internally, on issues pertaining to the Coalition

1. Weekly updates on LANL and regional news of interest for Board members
2. Fact Sheets and Updates on LANL and related outside organization activities
3. Subject matter expert invitations to supply information to Coalition, and compiled for Board members
4. “Map of LANL Stakeholders” – crafting of foundational document on stakeholder activities, contact information, and RCLC’s advocacy role with each stakeholder

b. External Communications Strategy
   i. JLH to work with ED and draft long-term plan to correspond to external communication of Coalition activities to the public
   ii. Better integration of website activities for internal sharing of documents

**Ongoing Work** (Daily, weekly or monthly activity)

I. Administrative Needs
   a. Presentations
      i. Executive Committee and/or ED to invite and vet all potential presenters to coalition meetings, to be determined 3 months in advance.
   b. Public Email Blasts
      i. JLH and ED to send out regular meeting notices and other pertinent email blasts via Constant Contact
   c. General Invoicing
      i. ED to work with Los Alamos County, the Coalition’s fiscal sponsor, and Treasurer to ensure all budgeting and payments out of the Coalition are properly crafted and are up-to-date.
   d. Board Meeting Execution
      i. ED to work with Board to ensure all meeting locations have been set at least three (3) months in advance.
      ii. JLH and ED to craft, post and archive all Meeting invitations and packets on website and cloud storage.
      iii. Board and ED to ensure that regular agenda item of Congressional representative updates
      iv. ED to work with Staff to ensure all meetings have proper provisions and necessary supplies
      v. ED to work with meeting minutes note taker to ensure minutes are vetted, posted and archived on website and cloud stored.
      vi. Board and ED to abide by all necessary rules to ensure compliance with the New Mexico Open Meetings Act
   e. Executive Committee meeting
      i. ED to orchestrate monthly Executive Committee exactly one week after monthly Board meeting.

II. Communications
   a. ED to have regular communications with Board members
      i. ED to ensure most/all Board members can attend each Board meeting
      ii. ED to have regular meetings with board members to keep them engaged on the issues
   b. JLH to work with ED to craft internal and external communications strategy directly responsive to drafted and finalized Work Plan

Approved this date on April 10th, 2015
